

PACKAGE INSERT – ACT HIB - Powder for injection vial and needle free diluent syringe

NAME OF THE MEDICINE

Act-HIB *Haemophilus* Type b Conjugate Vaccine (conjugated to tetanus protein)

Haemophilus Type b polysaccharide

DOSAGE FORM

Act-HIB is a freeze-dried powder for reconstitution with diluent for injection.

METHOD OF PREPARATION

Preparation:

Reconstitute with diluent.

The reconstituted product must be used immediately after reconstitution.

Compatibility:

DO NOT MIX Act-HIB IN THE SAME SYRINGE AS OTHER VACCINES OR MEDICINAL PRODUCTS. Once reconstituted, the vaccine must not be mixed with any other vaccine or medicinal product. Therefore, separate injection sites and different syringes should be used in case of concomitant administration.

Act-HIB can be incorporated into the recommended childhood immunization schedule, in accordance with the DTP schedule. However, the administration of Act-HIB should be carried out in a different site from those used for the other recommended vaccinations: Diphtheria, Tetanus, Pertussis, Poliomyelitis and Measles, Mumps and Rubella.

IN-USE STORAGE CONDITIONS

The reconstituted product must be used immediately after reconstitution.
